

Making North America: Human

Video: <https://www.pbs.org/video/nova-making-north-america-human/>

1. The Bering Land Bridge connected which two continents?
2. Do the bones found on Santa Rosa Island in California strengthen or weaken the theory that humans came to the Americas by walking across the Bering Land Bridge? Why?
3. Based on the bones found in the La Brea Tar Pits, what types of animals lived in North America during the last ice age?
4. What type of materials did early North American people use to make tools and weapons?
5. What was the main food source of the nomadic Native Americans living in the Great Plains?
6. Describe the structures built by the Puebloan people in Mesa Verde, Colorado.
7. Describe the relationship between tobacco and European immigration.
